Projects

1. Blog Website: **A personal website where I share motivational messages and views to friends to loved ones.Users can also post their opinions on this site.**
https://github.com/ekyeremeh7/blogPost.git

2. Web-Based App with Flask: **A web based app that was developed using flask framework**
https://github.com/ekyeremeh7/flaskproject.git

3. BusBooking Reservation System : **A website with Node.Js and Mongodb as backend .The Website is an online bus reservation system.Users of the website can book tickets to their various destination at the comfort of their homes without stress and energy**

https://github.com/ekyeremeh7/ busbookingWithNodejs.git

4. A To Do List Web app: **A fun project I did when I started studying Backend Programming.It is just a simple web app for internet users. Open a new tab for the website and use it while you are browsing online.List the things you plan on doing online whether movies to have to download,softwares to download,anything that is worth remembering so you would be able to fully use the internet for the reason you sat down to without forgetting anything**
https://gentle-sea-96914.herokuapp.com

5.My Newsletter App: **A web based application developed with MailChimp api to send newsletter to sign up users on my platform.**
https:// rocky-thicket-98728.herokuapp.com
